

**Sodium Acetate (Textile Grade)**

**SPECIFICATION**

We are engaged in offering Sodium Acetate, which are highly demanded by our global clients. It is processed as per international quality standards and is widely used in various sectors. We also import sodium acetate trihydrate ( $\text{NaC}_2\text{H}_3\text{O}_2 \cdot 3\text{H}_2\text{O}$ ) having molecular weight of 136. It is widely used for synthesis and processing in Chemical & Pharmaceutical industries and can also be used as a buffering agent.

**Sodium acetate is extensively used in various application areas mentioned below:**

- Electroplating as a reagent
- Tanning industry as washing salts
- Printing and dyeing of textile as a mordant
